### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In line 8 of page 6 of the specification the entire line "FIG. 5 is a side view...liner" has been deleted, since there is no FIG. 5 in the drawings and FIG. 5 is also not mentioned in the specification.

In claims 9 and 19, the second period at the end of each claim has been deleted.

The following is an examiner's statement of reasons for allowance: The prior art fails to teach or fairly suggest the claimed invention as a whole including a hydrodynamic face seal for a poppet valve rotating sleeve internal combustion engine, the engine comprising a rotating sleeve which may be rotated during the operation of the engine, and a cylinder head, the face seal comprising an annular face which may be positioned in proximity to the rotating sleeve, the mating surface comprising an inner sealing zone, and an outer loading zone, such that the loading zone comprises a plurality of hydrodynamic lift features, such that the lift features create converging surfaces; lubricant supply means, such that the lubricant supply means provides a lubricant to the mating surface, and such that a lubricant layer can be maintained between the face and the rotating sleeve. Note that the usage of the term "may be" in

several of the claims has been interpreted by the examiner to indicate a positive recitation of the limitation that follows.
